RELEASE NO: 02 - 20

Notice to Mariners: Aerial Vehicle Test June 17

The NASA Wallops Flight Facility will support the flight of an uninhabited aerial vehicle (remotely controlled airplane) off Wallops Island and out six miles between 7 a.m. to 4 p.m. June 17. The backup day is June 18.

The area in the Atlantic Ocean that poses a danger to mariners during the project is posted on the Boaters Launch Information page under the Wallops web site at www.wff.nasa.gov. Boaters are asked to remain clear of this area during operations.

Wallops will fly an orange blimp at 400 feet altitude over Wallops Island beginning at 30 minutes before the firings. The blimp will be lowered when the mission is completed and the danger to mariners no longer exists. In addition, boaters may tune to Marine Channel 12 to monitor the operations.

Completion of the mission will be noted on the Wallops launch status line at 757-824-2050.

Thank you for your assistance and support.
